

Oasis Hardscapes Grew From 3 to 11 Large Projects per Month After Automating Social Media

Client: Oasis Hardscapes & Design

Industry: Landscaping, custom patios, and outdoor living spaces

Location: Seattle

Team size: 8–10 workers

Service: Daily automated social media engine across Facebook and Instagram

Timeline: 2 months

The Results

Metric	Before	After
Monthly large projects	3	11
Monthly gross	\$45,000	\$165,000+
Lead source	Shared-lead platforms	Organic inbound DMs

The Challenge

Oasis Hardscapes & Design was stuck relying on shared-lead platforms like Angi and HomeAdvisor.

They were paying a premium for leads, but each lead was also being sold to multiple other local contractors. That forced Oasis into price competition and made it difficult to build a premium local brand.

Even though their work was highly visual, they had almost no organic presence in Seattle. Their before-and-after transformations were strong, but they were not being posted consistently enough to generate local demand.

“We had zero organic presence in our city. If we didn’t pay for a lead on platforms like Angi or HomeAdvisor, nobody knew we existed.”

What NAY Consults Did

NAY Consults implemented a daily automated social media engine for Oasis.

The system scheduled 30 days of content at a time, including:

- Before-and-after project photos
- Time-lapse job site videos
- Local community tags
- Facebook and Instagram posts

- Consistent daily publishing

The strategy was to turn Oasis's social media into a 24/7 local portfolio, allowing homeowners to see the quality of their work before ever reaching out.

The Transformation

Once the system went live, Oasis canceled its expensive shared-lead subscriptions and shifted to inbound organic DMs from local homeowners.

Homeowners were no longer comparing Oasis against the cheapest contractor. They were reaching out after seeing real examples of the company's work.

"By the time a homeowner messaged us, they were already sold on our quality. They weren't shopping for the cheapest price anymore; they specifically wanted us to build their yard."

In two months, Oasis grew from **3 to 11 large projects per month**, while monthly gross increased from around **\$45,000 to over \$165,000**.

For Oasis, social media stopped being another task on the owner's plate.

It became their best local sales asset.
